DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-11, as best understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Beck, Jr. et al. (5,632,748).

Beck, Jr. et al. disclose providing a graft 16 in bone tunnels 10 formed in the femur 10 and tibia. See, e.g., Fig. 1 and col. 6, line 24 - col. 7, line 24 and col. 15, lines 45-51. The grafts are secured in the tunnels by an interference screw 28 that may be formed of biodegradable materials (id.). The tunnels are tapped by the self-tapping threads of the device. See, e.g., Fig. 1 and col. 7, lines 35-62. Beck, Jr. et al. do not explicitly recite the biodegradable material comprising a copolymer of polylactic or polyglycolic acid and a bioceramic such as TCP or other calcium phosphates, hydroxyapatite, calcium sulfates, calcium oxides, calcium carbonates, and magnesium phosphates. It would have been obvious to one having ordinary skill in the art at the time the invention was made to form the device of a biodegradable material comprising a copolymer of polylactic or polyglycolic acid and a bioceramic such as TCP or other calcium phosphates, hydroxyapatite, calcium sulfates, calcium oxides, calcium carbonates, and magnesium phosphates, since it has been held to be within the general

skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416. It also would have been obvious to provide the copolymer of polylactic or polyglycolic acid in an amount comprising about 85 mole percent to about 95 mole percent of polylactic acid and about 5 mole percent to about 15 mole percent of polyglycolic acid; and to provide the bioceramic in an amount of about 2.0 volume percent to about 25.0 volume percent of bioceramic, or about 15.0 volume percent, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

Response to Arguments

Applicant's arguments filed 16 May 2005 have been fully considered but they are not persuasive.

In response to applicant's argument that Beck, Jr. et al. do not disclose or suggest the claimed invention, it has been held that to be entitled to weight in method claims, the recited structure limitations therein must affect the method in a manipulative sense, and not to amount to the mere claiming of a use of a particular structure. *Ex parte Pfeiffer*, 1962 C.D. 408 (1961). Here, Beck, Jr. et al. fully disclose the claimed invention, which is directed to a method. The particulars of the material to be used do not affect the method in a manipulative sense. Even if they did, it would have been obvious to a person of ordinary skill in the art to determine the same, as already set forth in the rejection.

Conclusion

This is a continued examination of applicant's earlier application. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
